## **ENVIRONMENTAL POLICY**

As a relatively small company the impact of our environmental activities are small, but the joint effort with other like minded companies could have a significant impact On the environment and the way we all work and live.

### Site

- Wherever possible use manufacturers who are close to the site location so as to reduce the impact that haulage has on the environment.
- Keep waste to a minimum and wherever possible segregate waste into purpose made containers or skips so as it can be recycled.
- Make sure that pallets are repaired and damaged and not just thrown away.
- Send pallets back if they are returnable.
- Be proactive in conserving energy through building design.
- Encourage the use of public transport within the company.
- Encourage work force to car share wherever possible.
- Make sure that operatives are working on our nearest site from where they are in residence.
- Encourage the use of car sharing if public transport is not feasible.
- Be aware and comply with any special environmental requirement that may be placed on a construction site, such as noise, and be considerate to others around you.
- Re cycle packaging / waste materials wherever possible.

### Office

- Use paper which has a FSC label approved by WWF
- Shred all unwanted paper and place in the paper bank.
- Re-use files.
- Wherever possible keep records on computer or magnetic disks.
- Switch all power of after use.( Do not leave on standby)
- Use wherever possible E-Mail for communication of forms etc.
- Turn the heating down a notch.
- Report all spillages of diesel etc immediately to the site management so as action can be taken to contain any hazard.
